**NOTICE TO
JERSEY CENTRAL POWER & LIGHT COMPANY CUSTOMERS**

**In the Matter of the Verified Petition of Jersey Central Power & Light Company
Constituting Its Annual Filings with Respect to the Non-Utility Generation Charge Clause
of Its Filed Tariff for 2021, 2022, 2023, and 2024 ("2021/2022/2023/2024 NGC Filing")**

BPU Docket No. ER24120874

PLEASE TAKE NOTICE that, on December 20, 2024, Jersey Central Power & Light Company ("JCP&L" or "Company") filed a verified petition with the New Jersey Board of Public Utilities ("Board") seeking review and approval of the deferred amounts included in JCP&L's Non-Utility Generation Charge ("NGC") deferred balance for 2021, 2022, 2023, and 2024 ("Petition").

Under JCP&L's Rider NGC, the composite NGC rate is currently set to -\$0.000215 per kilowatt-hour ("kWh") [excluding sales and use tax ("SUT")]. If the Petition is approved, the composite NGC rate would increase to \$0.000287 per kWh (excluding SUT). This would result in an increase to the monthly bill of a typical residential customer using 777 kilowatt-hours per month of \$0.42, or 0.3%, from a current bill of \$163.52 per month to \$163.94 per month based on the proposed Rider NGC and other rates effective as of October 1, 2025, including SUT.

The following illustrative chart shows the estimated monthly bill impacts, in both dollars and percentages, to class average customers based upon a comparison of current and proposed rates and the approximate net effect of the proposed increases. The "Current Monthly Bill" is calculated using the product of all customers' total usage in each class multiplied by all applicable current rates that are in effect as of October 1, 2025, by season and block (if applicable), including monthly fixed customer charges (fixture charges for the lighting class) during the 12-month period, divided by the number of customers and months in that class. The "Proposed Monthly Bill" is calculated in the same manner, except that the proposed NGC rate is used instead of the current NGC rate. The actual effect on specific customers will vary according to the applicable rate schedule and level of the customer's usage.
